# CS7637: Introduction & Start-of-Course Survey
# (Summer 2016)

**Due: May 22nd at 11:59PM UTC-12 ([Anywhere on Earth](#) time)**
Introduce yourself and complete the [start-of-course survey](#).

**Assignment: Getting Started with CS7637**
Welcome to CS7637! You have three tasks to complete for the first week:
1. Complete the start-of-course survey*, located [here](#). You can also find the survey under the Test & Quizzes tab on T-Square. We'll use the results of the start-of-course survey to inform when we schedule office hours, connect you to others in your discipline or geographic location, and inform other elements of how we structure the class.
2. Introduce yourself on Piazza! In T-Square, click the Piazza link on the left to access the Piazza forum for the class. You'll find several introduction threads -- post in the one for your name.
3. Read over the course materials, including the [syllabus](#), the [calendar](#), the description of [project 1](#), and the description of [assignment 1](#).

We also recommend that you [set T-Square to your local time zone](#) if you haven't already so that you'll see due dates in your own local time.

\* - Please do **not** complete the start-of-class survey until you're certain you plan to stay in the class, at least through the end of the first week. If there's a chance you may drop the class during Phase II registration (the first week of class), please wait until after the end of Phase II registration (Friday, May 15th, at 4:00PM EDT) to complete the start-of-class survey.
